The NEWS of June 2006

REPORT RECOGNIZES FLAWS IN EQUALIZATION BUT ONTARIO CAN'T AFFORD INCLUSION OF RESOURCES IN FORMULA

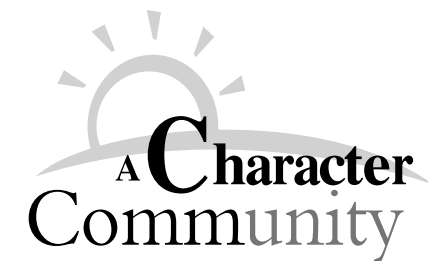

TORONTO- Today's report by the federal group examining equalization put forward many well thought out recommendations that would improve the program, but seriously underestimated the impact of natural resource revenue on contributing provinces-particularly Ontario.

"Ontario is proud of the role it has played in helping 'have-not' provinces for the past 50 years," said Len Crispino, President and CEO of the Ontario Chamber of Commerce.

However, the addition of resource revenue in the formula, combined with the proposed 10-province average, will make this program unsustainable for Ontario taxpayers."

A recent analysis by the Ontario Chamber of Commerce suggested that Ontario's per capita Gross Domestic Product is accelerating in its decline- from 112 per cent of the national average in 1990 to just 101 per cent in 2005. GDP per capita is a broad economic measure that is used by the Ontario Chamber and others to compare the relative economic health of one jurisdiction with another.

"This province's economy is declining compared to the other provinces-and yet this report suggests Ontario taxpayers dig deeper and pay more into a program that already funds higher level of services in other provinces," said Crispino. "Serious consideration must be given to Ontario's economic position and how a weaker Ontario will affect the whole country."

A thought from *Character Business Solutions* for the month of June: Honesty – I will be sincere, trustworthy and truthful.

Golf Tournament a Success!!
